***Allowable Subject Matter***

1. Claims 1-23 are allowed.

The following is an examiner's statement of reasons for allowance: The overall claimed combination of a magnetoelastic film in an absorbent structure is neither anticipated nor rendered obvious by the prior art of record. WO 200000233, WO 2003027636 and WO 2002078513 disclose an absorbent wetness detection system, but do not disclose a magnetoelastic film. Kim et al. US 2004/0014201 discloses a magnetoelastic biosensor, however, based on the priority date of the present application, Kim is not available as prior art. The non-patent literature reference to Grimes "Thin-Film Magnetoelastic Microsensors for Remote Query Biomedical Monitoring" teaches magnetoelastic films as sensor devices. Grimes teaches the films are cost effective can be made to be disposable. However, the prior art does not teach or suggest the use of magnetoelastic films in an absorbent article or for the detection of wetness, such as urine.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
